Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/734,297	Applicant(s) OHGANE ET AL.	
	Examiner Tae H. Yoon	Art Unit 1714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as obvious over JP 2000-085075.

JP teaches a multilayer coating substitution film comprising a transparent layer, a colored layer and an adhesive layer in abstract. Said colored layer would contain various mixtures of pigments such as titanium oxide and aluminum flake (see [0012] of English translation) meeting the instant invention.

Furthermore, paragraphs [0023] and [0024] of JP teach obtaining a film consisting of a clear layer/coloring layer/glue line before an extrusion lamination with a base material. Thus, it would have been obvious to one skilled in the art at the time of invention to utilize a mixture of titanium oxide and aluminum flake in said colored layer in obtaining said film consisting of a clear layer/coloring layer/glue line before an extrusion lamination of JP since JP teaches such modification.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as obvious over JP 2000-085075 in view of Komatsu et al (US 6,096,378) or JP 2002-294163.

Rejection is maintained for reason of record with above response.

Art Unit: 1714

Particle sizes of 3-7 microns and 5 microns or less taught by Komatsu et al fall within the claimed scope of the particle size contrary applicant's assertion.

In response to applicant's arguments against the references individually (JP'163 does not teach the instant three layer even though it teaches the instant particle size), one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H. Yoon whose telephone number is (571) 272-1128. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
